### DETAILED ACTION

1. Applicant's after-final amendment has been fully and carefully considered and will be entered.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

Page 1, line 1, insert --This application is a 371 of PCT/IB00/00145 filed February 10, 2000, which is a CIP of US Provisional Application 60/119,793 filed February 11, 1999.--

3. The following is an examiner's statement of reasons for allowance:

The invention relates to a process and burner assembly for secondary reforming comprising the steps of feeding a gas flow comprising oxygen in a combustion chamber through a feeding duct of a burner; feed a gas flow comprising hydrocarbons in the combustion chamber through a substantially annular passage defined externally to the feeding duct along a predetermined direction; mixing and reacting the gas flow comprising oxygen with the gas flow comprising hydrocarbons inside the combustion chamber obtaining a gas flow comprising hydrogen and carbon monoxide which is then introduced into a catalytic bed lying below the combustion chamber for carrying out a steam reforming reaction wherein the process comprises feed the gas flow comprising

oxygen in the combustion chamber in the form of a plurality of jets generated by corresponding parallel stream tubes having equal velocity within the gas flow comprising hydrocarbons, the jet being spaced from each other and mixing in the combustion chamber the gas flow comprising oxygen with amounts of gas flow comprising hydrocarbons at a constant ratio about the entire perimeter of the mixture zone. The prior art does not teach a process wherein the oxygen is distributed within the hydrocarbon gas flow so that each single oxygen jet contacts a corresponding different portion of hydrocarbons as shown in Figure 2, the process as claimed supercedes the prior art's secondary reforming process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. Bhat whose telephone number is 571-272-1397. The examiner can normally be reached on Monday-Friday, 9:30AM-6:00PM.
